

PROFESSIONAL SUMMARY

Third-year CS student with hands-on experience in Java, Python, and machine learning, looking to build technology that creates real impact at scale. I take ownership of what I build, write with reliability and security in mind, and thrive in environments where rigorous engineering and meaningful work go hand in hand.

EDUCATION

Degree	Institution	GRADE	Year
B. Tech	KL University, Hyderabad	9.13	2023-Present
Class XII	Sri Chaitanya Jr College, Hyderabad	93%	2020-2022
Class X	Narayana School, Hyderabad	10.0	2019-2020

TECHNICAL SKILLS

- **Languages:** Java, Python,C
- **Web & API's:** REST APIs, JSON Parsing, HTML, CSS, JavaScript
- **CS Fundamentals:** DSA, OOP, OS, DBMS, Computer Networks, AI/ML, System Design
- **Databases:** MySQL, MongoDB
- **Cloud & DevOps:** AWS, CI/CD, Agile, SDLC
- **Tools:** Git/GitHub, Linux/Unix, Bash, VS Code

PROJECTS

Medical Image Classification with Explainability | Python · PyTorch · CNN · Grad-CAM | 2025–2026

- Trained a ResNet-50 transfer learning model on 10,000+ chest X-ray images from the NIH dataset to detect pneumonia, effusion, and cardiomegaly, achieving 93% classification accuracy.
- Applied Grad-CAM to generate visual heatmaps over X-rays, making the model's predictions interpretable and clinically reviewable — going beyond just accuracy to explainability.
- Optimized batch processing pipeline cutting inference time by 40%, and evaluated model performance through ROC curves, confusion matrices, and per-class F1 scores.
- Used data augmentation techniques like rotation, flipping, and normalization to handle class imbalance across 3 disease categories in the training set.

Automated Movie Genre Prediction Using Plot Synopsis | Python · NLP · ML Pipeline | 2025–2026

- Built end-to-end NLP pipeline classifying genres from 10,000+ plot summaries using TF-IDF extraction.
- Trained 3 classifiers (Naive Bayes, Logistic Regression, Random Forest); achieved 94% accuracy, 12% above baseline.
- Automated full pipeline in Python, reducing classification time from hours to under 2 seconds per input.
- Performed result visualization using Python libraries (Matplotlib, Seaborn), comparing classifier performance through confusion matrices and accuracy graphs.

CERTIFICATIONS & ACHIEVEMENTS

- MongoDB Associate Developer
- Automation Anywhere Advanced RPA Professional
- AWS Cloud Practitioner
- Salesforce AgentForce Specialist
- Cambridge English B2 Certification
- NPTEL SWAYAM – Network Protocols
- AICTE EDUSKILLS – Data Engineering Internship

POSITIONS OF RESPONSIBILITY

- **Vice President, NSS Unit – KL University:** Led 10+ volunteers across 25+ initiatives; coordinated with NGOs and external stakeholders in fast-paced, mission-driven environment.
- **Stage Management & Protocol Head – TRIDENT (CSE Committee):** Organised large-scale tech events coordinating with speakers, performers, and technical teams under tight deadlines.
- **Sponsors Head – LOVE FOR AI EVENT(TRIDENT):** Acquired sponsorships for a large-scale AI-focused technical event, coordinating with external companies and managing sponsor relations.
