LinkedIn: UPPALAPATI YUKTHA SIRI

Summary

Computer Science student specializing in Data Science and Big Data Analytics with strong foundations in Python, Java, and SQL. Experienced in building backend-driven web applications, integrating databases, and applying data analysis concepts through academic projects. Familiar with API-based communication concepts and scalable system design.

Education

KL University — B. Tech in CSE (Data Science and Big Data Analytics), CGPA: 9.29 / 10	2023–Present
Sri Chaitanya Junior College — Intermediate (MPC), Marks: 967 / 1000	2021–2023
Sri Chaitanya High School — SSC, CGPA: 10 / 10	2020–2021

Skills

Programming Languages: Python, Java, C

Web & Frameworks: HTML, CSS, JavaScript, Flask, Stream lit

Databases & Core Concepts: MySQL, MongoDB, DSA, DBMS, OS, Backend Development, Data Analysis, NLP

Projects

Cart Companion – Social Commerce Platform (*Python, Flask, HTML, MongoDB*) | 2024

- **Role:** Worked on backend development using Flask, implementing routing, session handling, and user interaction logic.
- **Description:** Built a social commerce web application that enables users to shop together online through collaborative sessions, creating an interactive platform that synchronizes product browsing and supports real-time communication, replicating the in-store shopping experience.
- Implemented responsive user interfaces using HTML for a smooth user experience.

Meal Mate – Smart Recipe & Meal Planner (*Python, Flask, HTML*) | 2025

- **Role:** Worked as a backend developer, implementing application logic, routing, and request handling using Flask.
- **Description:** Created a personalized recommendation and meal planning system that dynamically matches user-provided ingredients with stored recipe data to suggest suitable dishes and support decision-making.
- Built a user interface using HTML for ingredient input and recipe display.

AI Resume Analyzer – Resume Screening Web Application (*Python, stream lit*) | 2026

- **Role:** Engineered the complete application, including backend logic, skill extraction, and UI design using Stream lit.
- **Description:** Analyzes resumes against job descriptions using skill-based matching to calculate compatibility scores. Implemented PDF parsing, skill extraction, match scoring, and improvement suggestions.
- Designed an interactive user interface with visual charts and downloadable analysis reports.

Published Research Paper – IJSER (April 2025)

Cart Companion: Bridging Traditional Shopping with Real-Time Interaction, 2025
