Summary

Computer Science student specializing in Data Science and Big Data Analytics with strong foundations in Python, Java, and SQL. Experienced in building backend-driven applications, working with databases, and applying data analysis concepts. Familiar with API-based communication and scalable system design.

Education

KL University — B.Tech in CSE (Data Science and Big Data Analytics), CGPA: 8.0 | 2023–Present

Skills

Programming Languages: Python, Java, C

Web Technologies: HTML, CSS, JavaScript

Databases & Core Concepts: MySQL, DSA, DBMS, OS, Backend Development, Data Analysis Concepts

Projects

Ride-Sharing Platform – Web Application (Python, Flask, HTML, MongoDB) | 2024

- My Role: Contributed to front-end and database development by building user interfaces using HTML and designing MongoDB schemas, handling data storage and retrieval.
- Concept: Developed a web-based ride sharing platform that connects students traveling on similar routes, enabling efficient ride matching and cost-sharing.
- Key Feature: Optimized route coordination to enhance convenience and reduce travel expenses.

AI-Powered Coding Assistant – Web Application (React, Node.js, OpenAI API) | 2025

- My Role: Built an AI-powered code assistant that suggests, debugs, and explains code using React, Node.js, and OpenAI GPT models.
- Concept: Built a web-based AI-powered coding assistant that suggests code, fixes errors, and explains logic using OpenAI APIs.
- Key Feature: Integrated an interactive code editor for real-time code suggestions and developer support.

Certifications

- Linguaskill Certification (CEFR B2) – Cambridge University Press & Assessment
- Certified Advanced Automation Professional (RPA) – Automation Anywhere
- AWS Certified Solutions Architect – Amazon Web Services
